

The Dry Egg-Foods

Dry egg food is usually recommended for breeding, although it is not particularly suitable for the moulting period.

NEW

•BIANCOCOUS

NO COLOURINGS, WITH EGG WHITE, COUSCOUS, SILIMARINE AND PREBIOTICS

BIANCOCOUS is a dry egg-food without colourings, with biscuits containing egg white (egg white 20%) to avoid undesirable colours. Contains Couscous, OLIGOSACCHARIDES for better bowel flora adjustment, BETA-GLUCANS to stimulate the immune system, PROTECTED VITAMINS, METHONINE, LYSINE and SILIMARINE, well known for its liver protection and regeneration properties. DOES NOT CONTAIN SEEDS.

NEW

•BIANCOVIT SPECIAL
