

• MUSS SPECIAL

**NO SEEDS, WITH EGG 16%
AND PREBIOTICS**

Dry egg-food suitable for all types of birds which need rich and balanced feeding.

Its high egg content, which brings noble proteins of an animal origin, is suitable even for insectivores.

Contains OLIGOSACCHARIDES for better bowel flora adjustment, BETA-GLUCANS to stimulate the immune system, PROTECTED VITAMINS, METHONINE and LYSINE. DOES NOT CONTAIN SEEDS.

• NEW MUSS

WITH EGG 16% AND PREBIOTICS

Dry egg-food suitable for all types of birds which need rich and balanced feeding.

Its high egg content, which brings noble proteins of an animal origin, is suitable even for insectivores.

Contains OLIGOSACCHARIDES for better bowel flora adjustment, BETA-GLUCANS to stimulate the immune system, PROTECTED VITAMINS, METHONINE and LYSINE.

• PAPAFOOD

**NO SEEDS, WITH EGG 12%,
PREBIOTICS AND SHRIMPS**

Dry egg-food, due to its HIGH EGG CONTENT and its COARSE STRUCTURE it is ideal for breeding cockatiels, love birds and all small size parrots.

Contains SHRIMPS, OLIGOSACCHARIDES for better bowel flora adjustment, BETA-GLUCANS to stimulate the immune system, PROTECTED VITAMINS, METHONINE and LYSINE. DOES NOT CONTAIN SEEDS.
