

•RD 63

STRENGTHENER WITH HALIBUT LIVER OIL AND SEAWEEDS
MATING – BREEDING – GROWTH

INGREDIENTS: Dextrose, Halibut liver oil, Ginseng.
CONTENTS PER Kg: Vitamin A 2 200 000 U.I. – Vitamin D3 – 220 000 U.I. – Vitamin E 4500 mg – Selenium 4 mg.

RD 63 has optimum strengthening properties and contains:

- Halibut liver oil
- Vitamins of natural origin A - D3, therefore better tolerated by the organism and more effective with respect to synthetic vitamins.
- Vitamin E and Selenium, particularly useful for fertility.
- Ginseng as a stimulant and strengthening element.

USEFUL HINTS: 20 g for each Kg of egg-food, for 20 days for the males and 15 days for the females before mating; for 20 days for the chicks when they are weaned; continually (during feather loss) for those breeds which must not be coloured. Do not use for breeds undergoing colouring.

Leave it freely available to the males, in a suitable container, between one mate and the next and for the females when beakful feeding.

Powder - Pot 100 g
